Reading Comprehension Story Form curriculum by Language Circle Enterprises® is designed to assist primary through adult-aged learners in “breaking open” text, using multisensory strategies to explore narrative literature.

Teaches a process to interact with narrative literature to prepare students for all academic reading. Activities are specifically structured to help students explore fiction texts through the study of story structure, analysis, and sequential story form.

Higher level thinking skills are promoted through Bloom’s Taxonomy. These strategies teach students to analyze, synthesize, and use evaluative thinking.
